

DESERT STARTER

2 - 18 - 5

GUARANTEED ANALYSIS

Total Nitrogen (N)	2.0%
2% Ammoniacal Nitrogen	
Available Phosphate (P ₂ O ₅)	18.0%
Soluble Potash (K ₂ O)	5.0%

Derived from Ammonium Phosphate and Potassium Phosphate

General Information

Desert Starter 2-18-5 is a liquid fertilizer designed for use on all crops including vegetables where the addition of nitrogen, phosphorous and potassium might be beneficial.

Desert Starter 2-18-5 may be applied through drip sprinkler and micro-irrigation on in-furrow below the seed application. When Desert Starter 2-18-5 is injected in drip, drip tape or micro sprinklers, a jar test for compatibility with the irrigation water is recommended. Desert Starter 2-18-5 is compatible with many liquid fertilizers, micronutrients, pesticides and water. Addition of Desert Starter 2-18-5 to these products should not be done without first testing compatibility on a small scale.

For Soil Applications:

When mixing with water fill container half full, add Desert Starter 2-18-5, then the remaining water. When mixing with pesticides, insecticides which includes imidacloprid, dilute Desert Starter 2-18-5 with water prior to the addition of buffering agents and pesticides. Follow all directions and precautions on pesticide labels prior to mixing with Desert Starter 2-18-5. Ensure adequate agitation in all situations.

General Recommendations

Maintenance Applications 2 - 4 quarts./acre

Desert Starter 2-18-5 is intended to be used as a supplemental treatment to a regular fertility program and may not supply the total nutrients required by a crop.

NOTE: A number of variables influence the rate of application necessary to control or correct a specific deficiency. For best results, follow good agronomic practices, soil test and if necessary use tissue analysis. For more information contact your local agricultural specialist.
