

FERTA-MIC Mn

12-0-0

For Quick Greening Turf, Ornamentals To Correct Iron Deficiency

GUARANTEED ANALYSIS

12-0-0 + 2% Manganese

Total Nitrogen (N).....	12.0%
12.0% Urea Nitrogen	
Sulfur (S).....	4.0%
4.0% Combined Sulfur	
Iron (Fe).....	6.0%
6.0% Chelated Iron	
Manganese (Mn).....	2.0%
2.0% Chelated Manganese	

12-0-0 + 2% Manganese (Urea, Potassium Sulfate and Manganese Citrate)

SPECIAL FEATURES:

- Chelated iron and manganese promotes quick greening.
- Promotes darker color of plant foliage, encourages chlorophyll formation.
- Highly concentrated 2 to 8 oz. treats 1,000 sq. ft.

DIRECTIONS FOR COMMERCIAL FERTILIZER USE

TURF AREAS: Use on blue grass, bermudla, bent grass, rye grass, fescue, St. Augustine, zoysia and other grass varieties. The type of grass, rate of growth, color and time of the year will determine rate and frequency of application. Grasses growing in shaded require less fertilizer then when growing in full sun.

GREEN AND TEES: Use 2 to 8 fluid ounces (59 to 237 ml.) in sufficient water, 10 to 20 gallons (38 to 76 liters) to cover 1,000 sq.ft. (93 sq.ms.). Apply 2 to 3 times during the growing season or as needed,

FAIRWAYS: Use 6 to 10 fluid ounces (177 to 296 mls.) in sufficient water, 20 to 50 gallons (76 to 189 liters) to cover 1,000 sq.ft. (93 sq.ms.). Apply as needed.

TURF: Typically needs 1 to 4 Lbs. (454 to 1,816 grams) of nitrogen per 1,000 sq.ft. (93 sq.) per growing season. An 8-fluid ounce (0.677 Lbs.) of FERTA-MIC provides 0.081 Lb. nitrogen per 1,000 sq.ft., The use of this product in conjunction with an additional fertilizer to provide at least 1 Lb. of nitrogen per 1,000 sq.ft. per growing season is recommended.

GROUND COVER AREAS: Use 6 to 8 fluid ounces (177 to 237 mls.) in minimum of 20 to 25 gallons (76 to 95 liters) of water, apply as a full coverage spray. For backpack spray: use 1 to 2 fluid ounces (30 to 59 ml.) per 3 to 6 gallons (11 to 23 liters) of water.

TREES, SHRUBS AND VINES: Use 1 to 2 quarts (1 to 2 liters) per 100 to 400 gallons (378 to 1,514 liters) of water and apply as full coverage spray.

SOIL DRENCHES

When foliar sprays are not desirable, mix 16 fluid ounces (473 ml.) in 25 gallons of water (95 liters), apply as soil drench under the drip zone of the leaves.

AGRICULTURAL FIELD AND VEGETABLE CROPS: Use 6 to 8 fluid ounces (177 to 236 ml.) in 40 to 50 gallons of water (152 to 189 liters) per acre as needed.

AVAILABLE IN:

- 2.5 - Gallon Bottle
- 30 - Gallon Drum
- 55 - Gallon Drum
- Bulk Delivery

Density: 10.78 Lbs./Gal.
