

Nutra-Zorb Starter Fertilizers are designed for use in all soil types and may be applied to most vegetables, field and new crops. Apply directly under the seed at planting or side-dress. Placement and rates of application are important for best results. Application rates of Nutra-Zorb will vary depending upon the crop being grown.

CAUTION: Check compatibility with other products prior to full-scale tank mix.

MOISTURE CONDITIONS - ALL CROPS: For germination relying on adequate rainfall, sprinkler or furrow irrigation spray or dribble under or at side of seed at planting, under cooler, wetter conditions - use the higher recommended rate. Under these moisture conditions, it is recommended to reduce Nutra-Zorb rates by 1 gallon per acre.

CAUTION: Do not use under marginal moisture conditions.

MIXING INSTRUCTIONS:

Nutra-Zorb disperses well in water with a minimum agitation. For best results, mix as follows:

- 1) Partially fill tank with water, maintain agitation.
- 2) Add Nutra-Zorb to tank and circulate.
- 3) Add other nutrients or pesticides (if compatible).
- 4) Fill tank and agitate thoroughly.

DIRECTIONS:

CORN, COTTON, GRAIN, SORGHUM:

For crops planted on 30-inch row spacing, use 3 to 6 gallons Nutra-Zorb per acre. For 40-inch row spacing, use 3 to 5 gallons Nutra-Zorb per acre.

VEGETABLES & MELONS:

For crops planted 2 rows to the bed, use 8-to 10 gallons Nutra-Zorb per acre. For 1-row bed, use 4 to 5 gallons Nutra-Zorb per acre.

DILUTION:

Nutra-Zorb may be diluted with an equal amount of water for added safety and to simplify calibration.

CAUTION: Do not use under marginal moisture conditions.

LIMITED WARRANTY:

Manufacturer or seller makes no warranty, whether expressed or implied concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer or seller shall be liable for any injury nor damage caused by this product due to misuse, mishandling or any application not specifically described on this label.

CAUTION: Avoid contact with eyes and skin. In case of eye and skin contact, flush water the area affected with plenty of water for 15 minutes. Call a physician.
