

HUMIC ACID

LIQUID EXTENDED

CALCIUM COMPATIBLE HUMIC ACID

4% HUMIC ACID

2% CDFA HUMIC CONTENT

MIX WITH

10-34-0

CALCIUM NITRATE SOLUTIONS

CN-9

ACID FERTILIZER

CAN-17

CALCIUM THIO SULFATE

THE CALCIUM COMPATIBLE HUMIC ACID ADVANTAGE:

- Provides a rich source of organic carbon
- Stimulates root growth, promotes beneficial soil microbial growth
- Enhances soil nutrient retention and root system availability
- Organic carbon stimulates and provides substrate for soil microbes
- Enhances plants ability to uptake Calcium, Potassium, Nitrogen, Magnesium, Sulfur and Micros

THE TECHNOLOGY

High temperature reaction (above 100°C) under sufficient pressure to prevent evaporation together with insolubles filtration and high speed centrifugation produces a humic acid product with excellent solubility in acid solution and complex calcium fertilizer solutions.

WHEN TO USE

- Apply in combination with calcium fertilizer any time of the growing season for synergistic root initiation response and significant increase in calcium in leaf and fruit. Apply 2 to 5 gallons per acre in drip or water run (18 to 45 liters / HA).
- Apply in combination with potassium fertilizer to increase absorption and utilization of soluble potassium for enhanced size, color and sugar content. Apply 5 to 8 gallon per acre (45 to 72 liters / HA)
