

Helps Increase:

- Fertilizer Efficiency • Crop quality & Yield
- Shelf Life & Storage Ability

Helps Improve:

- Color, Size, Market Appeal
- Buffering Capacity of Pesticide/Fungicide Tank Mixes in preferred pH Range – Slightly Acidic.

Vegetable: Use 200 cc per 100 liters of water at 3 to 5 leaf stage every 14 to 21 days as needed.

Tomato, Cucumber: Use 200 cc per 100 liters of water at 15 to 20 cm growth stage. Repeat every 14 to 21 days as needed.

Field Crops: Use as full coverage spray at 4 to 6 leaf stage. Repeat as needed.

Corn, Peanuts, Rice, Sugar Beets:
Use 2 liters at 4 to 6 leaf stage every 14 to 21 days as needed.

Cotton: 2.5 Liters at early squaring repeat at first flower sign repeat every, 14 days.

Gro Folan

11-8-6

Vegetables • Fruits

Gro Folan provides a unique synergism of N-P-K, Micronutrients, Vitamins, Amino Acids and natural occurring growth hormones from plant extracts. Properly timed foliar application of bio-available Gro Folan ingredients during the critical nutrient demand period of the vegetative and reproductive cycles of growth helps maintain optimal growth to improve quality and yields.

DIRECTIONS:

Vegetables: Use at rate of (0.2%) or 20cc per 10 liters of water for peppers, tomatoes, melons, peas, beans, strawberries, onions, cabbage, potatoes, garlic and rice, 1 st spray every 30 to 40 days after planting and continue spray every 10 to 14 days up until harvest or use as needed.

Field Crops: Use at rate of (0.3%) or 30cc per 10 liters of water for tea, coffee, rubber, cotton, peanuts. Spray every 10 to 14 days or as needed.

Fruit & Nut Trees: Use at rate of (0.3%) or 30cc per 10 liters of water for citrus, oranges, tangerines, grapes, durians, longans, papayas, cocoa. 1st spray one or two weeks before bloom, follow with post bloom spray after pollination. Spray every 10 to 14 days or as needed up until 2 weeks before harvest.
