

AVAILABLE GRO FOLAN FORMULAS

Formulated to provide a unique synergism consisting of NPK, micronutrients, amino acids, natural occurring plant extracts that supply bio-available nutrients during critical plant growth periods.

- Supports and improves abiotic stress tolerance.
- Improves conversion of applied nutrients to plant available forms
- Increases plant nutrient assimilation efficiency.

An interruption of nutrient supply or insufficient nutrients during critical vegetative or reproductive growth can reduce or impair optimal growth, quality and effect yields.

Three or four applications of GRO FOLAN are recommended during the growing season.
