

Designed for use as foliar or soil applications, CITRA GROW IRON is formulated for the prevention or correction of nutrient deficiencies during the growing season.

**DIRECTIONS:**

We recommend performing tissue test to determine crops utilization of nutrients. Total rate per acre or HA should be based on estimated crop need as determined by tissue, soil or fruit & nut analysis.

**FIELD & VEGETABLE CROPS:**

**Foliar Feed:** Use 2 to 3 quarts per acre (4.5 to 6.8 liters per HA). Apply at 4 to 5 true leaf stage or at bud stage before bloom. Subsequent applications can be made at 3 to 4-week intervals as needed. Use sufficient water for full coverage spray.

**Soil Feed:** Use 1 to 1.5 gallons per acre (9 to 13.6 liters per HA).

**FRUIT, VINE & NUT CROPS:**

**Foliar Feed:** Use 4 to 6 quarts per acre (9 to 14 liters per HA). Apply at bud swell or as pre-bloom spray. Subsequent applications can be every 4-6 weeks as needed. Use sufficient water for full coverage spray.

**Soil Feed:** Use 2 to 3 gallons per acre (18 to 27 liters per HA).

# CITRA-GROW

## Iron

### Foliar or Soil

**GUARANTEED ANALYSIS**

Iron (Fe)..... 5.0%  
5.0% Chelated Iron

Formulated from Humous Sulfate and Citric Acid

**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

**DENSITY: 9.73 LBS / GALLON**

**NET CONTENT: 2.5 GALLONS (9.46 L)**

**MIXING-STORAGE-HANDLING:**

Add Citra-Grow to tank when half-full. Perform jar test prior to using previously untried combinations. Protect from freezing.

**COMPATIBILITY:**

Dilute Citra-Grow prior to adding other spray chemicals. Grow More is compatible with most commonly used pesticides, herbicides, fungicides, amines and surfactants.
