

RHIZO FEED is a liquid carbon based fertilizer additive, formulated to support plant root zone rhizosphere microbial activity. Contains 34% sugar.

COMPATIBILITY:

- Compatible with most commonly used fertilizers and water soluble fertilizers.
- Ideal companion product with ammonium phosphate and orthophosphate solution – side dress or banded.
- Low pH 3.7, helps control bicarbonate.

DIRECTIONS: Apply to all major crops field, vegetables, row crops, vines, fruit and nut trees, avocado, citrus.

APPLICATION: Combine RHIZO FEED with other liquids and water soluble fertilizers at a 10 to 20% admix rate.

IN FURROW: 3 to 7 gallons per acre } as needed

BANDED: 2 to 3 gallons per acre } as needed

CULTIVATION: 7 to 12 gallons per acre } as needed

BROADCAST: 5 to 10 gallons per acre } as needed
0.50 to 1 qt. / 1000 sq. ft. } as needed

DRIP IRRIGATION: ½ to 1 gallon per acre } as needed
Add 25 to 50% water for better distribution
Use up within 48 hours.

Prior to combining RHIZO FEED with other liquid fertilizers, we recommend performing a jar test to determine compatibility.
